Dear Ray:

25X1A [] mentioned that he had had a long conversation over the phone with you recently: perhaps the following is repetitive.

25X1A

However, I thought it important to formally request you, in turn, to require that [] provide us with full data on actual groove profile and energy distribution of the final, trial #1, 2" x 2" grating which they plan to present in January. We have the projected theoretical data on their chosen combination of groove shape and radius, but a read-out on actual results would be helpful for evaluating the first trial.

25X1A

[] seemed impressed by [] groove-measuring facilities, so we feel justified in requiring such data from them. I would appreciate a copy of whatever correspondence you have with [] on this matter.

Dick also might have indicated that there is a possible, alternative means of funding [] work beyond Phase II, trial #2, if we decide on our own part for a cut-off at that time. This is information which should certainly be held between us until we have a more concrete statement to offer.

25X1A

Is it necessary for me to provide any written statement to get immediate action on payments from your company to [] I think we've already asked enough of [] "good faith!"

25X1A

Will undoubtedly call you when I return.

Best regards,
